

FOR CURRENT STUDENTS

Resources

In addition to the resources we've listed on our site, you should visit [Resources for Undergraduates in Mathematics](#) available from the AMS and [Resources for Minority Faculty and Students](#) available from the MAA.

MEETINGS AND CONFERENCES There are a number of meetings and conferences where undergraduates can give talks or attend to be exposed to the wider mathematical community. There is internal funding to attend these conferences: Fleming Student Travel Fund.

- [AMS Meetings and Conferences Page](#)
- [AMS Mathematics Calendar](#) (a HUGE list of all the math meetings)
- [Texas Undergraduate Mathematics Conference](#)
- [Texas Section MAA Meeting](#)
- [Nebraska Conference for Undergraduate Women of Mathematics](#)

CONTEST ANNOUNCEMENTS AND PROBLEM ARCHIVES

- [COMAP: The Mathematical Contest in Modeling](#)
- The annual [William Lowell Mathematics Competition](#)
- [Website of American Mathematics Competitions](#)
- [International Mathematical Olympiad \(IMO\) Official Site](#)
- [Mudd Math Fun Facts](#) hosted by Harvey Mudd College Math Dept.

OPPORTUNITIES AT SU

- [SCOPE: Summer Collaborative Opportunities and Experiences](#). Work with faculty members for 8 weeks during the summer on their research. Past projects have included an analysis of Choose-Your-Own-Adventure books using Graph Theory, developing of Tetris-playing programs using evolved neural networks, and research in diagonalizing matrices.
- [King Creativity Fund](#) for creative projects. Students have used the fund to develop various projects: a 3D interactive computer game to aid in the teaching of languages, a system for automatically counting bacterial colonies using photo input, and a wheelchair controlled by special glove. Deadline is in October.
- [Research and Creative Works Symposium](#). An annual celebration of the work of SU students doing research and creating works of art.

- [NASA MUST Scholarship](#) for undergraduates in Science, Technology, Engineering, and Mathematics

SUMMER PROGRAMS

There are many summer research programs at universities around the country. Most application deadlines are in Feb - Mar, so start looking in January!

- [AMS List of Summer Internships](#)
- [NSF List of REUs](#) , be sure to check out their links to other REUs at the bottom of their page.
- [AMS List of REUs](#)
- [MAA List of REUs](#)
- [Internships and Research Opportunities in National Facilities and Laboratories](#) (Hosted by the U. Pennsylvania)
- [NSA summer programs](#) (deadline: Aug-Oct)

INTERNSHIPS

Visit the [Office of Career Services](#) for more information. (acturial: [Watson Wyatt](#))

- [Mass Media Science and Engineering Fellows Program](#)
- [NASA MUST Scholarship](#) for undergraduates in Science, Technology, Engineering, and Mathematics

Application advice: Your **personal statement** is the most important document in your application!!!! Have people read it before sending it off (maybe take it to the Debby Ellis writing center). The next most important documents are the **letters of recommendation**. If you want a good one, give the professor a copy of your personal statement (even in rough form), an informal resume (listing clubs you are involved in, your GPA, etc.), and any other helpful information.

SEMESTER PROGRAMS

- [Budapest Semesters in Mathematics \(BSM\)](#) (a program in Budapest, Hungary in English for American & Canadian undergraduates)
- [Math in Moscow](#) (a study abroad program in Moscow, Russia in English)
- [Mathematics Advanced Study Semesters \(MASS\)](#) a fall semester program at Penn State for junior/seniors
- [The Junior Program at the Center for Women in Mathematics at Smith College](#) a math intense semester or a year during the Junior year for female math majors

CAREER OPPORTUNITIES

- [Mathematical Sciences Career Information](#) from AMS-MAA-SIAM Project for Nonacademic

- Association of Women in Mathematics [Career Resources](#) .
- [We Use Math](#) A source for career and other interesting information
- A good webpage on [math careers](#)
- Another guide for math careers: [Your Guide to a Career with Numbers](#)
- "[Applied math becomes more popular among students](#)" by Shelly K. Schwartz for CNNfn (11/10/00).
- [Project Seed](#) , teach advanced mathematics to children of all grade levels and we require no prior teaching experience or certification.
- [Mathematical Moments](#) from the AMS shows how math is used in many different areas.
- Visit the [Southwestern University Center for Career and Professional Development Web Page](#), and visit their offices for a great brochure: "Major Possibilities: Mathematics."
- **Statistics:** The [American Statistical Association's web site](#) with information about what statisticians do and careers in statistics.
- **Applied Mathematics:** see the [SIAM career web site](#) .
- **Actuarial Science:** The [Casualty Actuarial Society](#) and [Society of Actuaries](#) have web sites packed with information about the actuarial science profession and the academic preparation to be an actuary.
- **Operations Research/Management Science:** [career information](#) .
- **National Security Agency:** Career information at the [NSA](#) .

Some Prospective Math Employers: American Express, American Management Systems, Anderson Consulting, Boeing Company, Boeing North America - Rocketdyne Division, CompuCom Systems Inc., Computerland of Salt Lake, Cypress Semiconductor, Defense Information System Agency, Dolby Laboratories, EDO Corporation, Franklin Quest, Guardian Industries, HK Systems, IBM Corporation, Lockheed Martin Idaho Technologies, Lockheed Martin - Technical Operations, McKinsey & Company, Micron Technology, Microsoft Corporation, MONY Financial Services, Nichols Research Group, Pepsi-Cola Company, Pfizer, Inc., Prudential Preferred Services, Ragula Systems, Raytheon TI Systems, Sterling Wentworth, Systems Simulation Solutions, Inc., TenFold Corporation, The Gallup Association, Varian, and Victaulin Company of America. (This list came from Prof. Jennifer Quinn at Occidental College.)
