

FOR CURRENT STUDENTS

Internships

Academic and Summer Internships

A number of academic and summer internships are available in sociology and anthropology.

Students have worked in a variety of setting for internships, including adult and juvenile probation, drug rehabilitation centers, the Attorney General’s Office, and Texas politicians. Students interested in academic internships should contact the Director of Internships in the Office of Career Services at least one semester prior to the planned internship and should submit a resume and complete all paperwork with the Office of Career Services.
