PERFORMANCE

THEATRE COMPANY

Students enrolled in this course will form a company of artists who will support departmental productions by working six hours per week in the areas of scenery, costumes, lighting, or sound. Additionally, students will fulfill back stage crew or front of house management and ushering assignments; and serve as assistant directors, designers, shop managers, and stage managers. Students will also participate in a specified number of workshops, master classes, dramatic literature lecture/discussions, and attend professional and educational performances. The final two semesters of Theatre Company must occur during their senior year.

DESIGN FUNDAMENTALS

This beginning design course provides students the opportunity to explore the major areas of design for theatrical production: costume, scenery/props, sound and lighting. Students will be exposed to theatrical drawing, rendering, script analysis and collaboration. The format of this class will vary from discussion to lecture to group activities. This course is open to only first year students and sophomores. Juniors and seniors may register with the permission of the instructor.

THEATRE LABORATORY

This course is designed to complement Theatre Company by providing a laboratory setting for students to learn and develop their skills in technical theatre which in turn will support the production component of the curriculum.

THEATRE PRODUCTION PRACTICUM

season. For non-major students only.

MAKEUP DESIGN

Design and practice in the art of stage, screen and print makeup. The course focuses on development of skills for the practicing theatre artist.

THEATRE ARTS MANAGEMENT

Studies of the managerial aspects of creating, producing and promoting both commercial and non-profit theatre (educational, community and professional).

COSTUME DESIGN

A study of the art and practice of theatrical costume design. Emphasis will be placed on the costume designer's requirements for pre-production. Topics covered include analysis, research, basic figure proportion, color theory, sketching, swatching and rendering. Students will present design concepts through a series of renderings for selected periods and plays.

SCENIC DESIGN

A study of the art and practice of theatrical scenic design. The focus of the course will be on the traditional approaches to scenic design and a study of the elements of composition as they apply to scenery. Students will work with different theatrical styles and settings and will present design concepts through painted renderings and/or models as well as draftings.

THEATRE SUSTAINABILITY

Using the black-box space Heather Hall as a model, this course introduces students to a variety of strategies that seek to lessen the wasteful material nature often associated with traditional theatre production. Electrical energy consumption and renewable energy production are major facets of study; however, scenery, properties, costumes, performance and the business aspects of theatre production will also be explored. Also Environmental Studies 49-814.

LIGHTING DESIGN

followed by the study and research of a selected classic painting. Related topics include additive color theory, lighting in a variety of theatrical spaces, and working with incandescent and LED fixtures.

AUDIO TECHNOLOGY AND DESIGN

An introductory study of theatre sound systems and design for theatrical performance. Using the systems in the Department's performance spaces, students will become familiar with mixers, effects processors, amplification and microphone technology. Students will experience the design process and gain hands-on experience as assistant designers, audio engineers and programmer/operators in plays produced by the Department.

SCENIC ELEMENTS AND STAGE PROPERTIES

This course specializes in the area of scenic building and properties production for the stage. Areas covered include basic sewing for the stage and more advanced prop fabrication. From initial script analysis for props, to working with designers, directors, stage management and prop assistants, the student will explore ways to build/buy/borrow or find the props best suited to the production.

SCENE PAINTING

A practical activity-based and lecture course which specializes in the study of various paint finishes and techniques that are applied to stage scenery. When working on class assignments, students will have the opportunity to experiment with paint, binders, tools and techniques. The techniques covered serve as a foundation for further study and exploration in the art of scene painting.

STAGE MANAGEMENT FOR THE THEATRE

An introduction to stage management for academic and professional theatre. This project-oriented course provides students with a survey of techniques and strategies aimed at modeling successful stage management. Students will gain hands-on experience by working in stage management in the Department's performance spaces.
